

Welcome to Margate Caves

Explore the Caves and enter a world of mystery and myth, where you never know what tale (or tail) lies around the corner.

At the lowest point of the Caves you will be **50ft** below the ground!

Throughout the Caves you'll see remains of former paintings - these paintings are known as

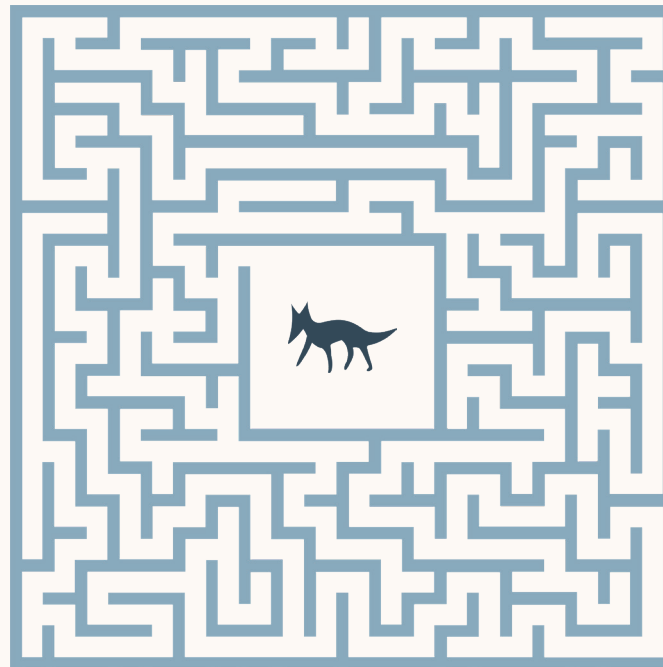

'ghosts'.

The pits were once used to store ice and show off wealth but they're rumoured to have **darker origins.**

What do you think they were used for?
